

# THE GLEICHEN CALL

VOLUME XXX NO. 23

GLEICHEN, ALBERTA, WEDNESDAY AUGUST 25, 1937

SUBSCRIPTION \$2.00 PER YEAR

## U. F. W. A. LADIES APPOINT PROGRAM COMM.

Mrs. Harry Burne was hostess to the U.F.W.A. ladies last Thursday afternoon August 19th. The roll call was answered by Hints on Dress-making and was answered by 26 members and visitors. The sick committee reported that Mrs. J. C. Buckley was not very well and the meeting recommended that a gift of fruit be sent to Mrs. Buckley.

The program committee for 1937-38 was appointed and will consist of: Mrs. McLeay, as convener, Mrs. McLeay will have as helpers Mrs. Koefer, Mrs. Stott and Mrs. McKeever. A correction was made on the program for the next meeting which was scheduled for Friday September 3, but will be held on Thursday, September 2nd.

Mrs. Oliver kindly offered her home for the meeting scheduled for September 10th, as Mrs. Day was unable to take the meeting.

Mrs. McArthur read a very interesting bulletin on Political Economics. It was planned to have a farewell tea by the ladies of the U.F.W.A. at the home of Mrs. Umbrie for Mrs. Garland who is shortly to leave Gleichen and make her home in Calgary.

Tea prize was then drawn for an Mrs. Umbrie was declared the winner for a lovely cake plate, after which the hostess and helpers served a dainty lunch which was thoroughly enjoyed by all.

The next meeting will be held at the home of Mrs. Earl Ethridge on Sept. 2nd.

## REGULATIONS FOR THIS YEAR'S SHOOTING ISSUE.

The National Parks Service of the Department of Mines and Resources, Ottawa, has just issued its regulations regarding migratory bird for the current year.

A summary of the regulations as they apply to Alberta follows:

Ducks, geese, coots, rails and Wilson's or Jack-snipe. Both dates in clause.

In that part of Alberta lying north of the right bank of the Athabasca River (going down stream) and of the left bank of the Clearwater River (going down stream): from noon on September 1 to and including October 30.

In that part of Alberta lying south of the right bank of the Athabasca River (going down stream) and of the left bank of the Clearwater River (going down stream): from noon on September 15 to and including November 15th.

No person shall kill, hunt, capture, injure, take or molest any migratory game birds during the closed season and no person shall sell, expose for sale, offer for sale, buy, trade or traffic in any migratory game bird at any time.

The possession of migratory game animals in Alberta until March 31 following open season.

Ducks, 12 in any day; geese 5 in any day; coots and rails, Wilson or Jack-snipe, 25 in any day and not more than 100 ducks or 25 geese in one season.

The use of automatic (auto-loading) guns unless the magazine has been permanently plugged or altered so that it cannot carry more than one cartridge, or switch, or machine gun, or battery, or rifle, or any gun larger than number 10 gauge is prohibited. The use of power boat, sail boat, live birds as decoys, night light and shooting from any horse-drawn or motor vehicle is forbidden. The hunting of migratory game birds on areas baited with grain or other artificial food is prohibited. The shooting of migratory birds earlier than one hour before sunrise or later than one hour after sunset is prohibited.

The penalty for violation of the migratory bird laws is a fine of not more than three hundred dollars and not less than ten dollars, or imprisonment for a term not exceeding six months, or both fine and imprisonment.

## THEY BROKE A MONOPOLY

One of the most interesting stories in the annals of Western Canada is

## News Items of Local Interest

A Saue almost drove his wagon over his child's foot one evening last week. When starting up his team the child was not supposed to be nearby, however, he heard a cry and just stopped in the nick of time. Apparently the wheel of the wagon had just touched the foot which was slightly crushed and bruised, no bones being broken. Another inch or so and the foot would likely have been crushed to pulp.

Next Wednesday morning, September 1st, the Gleichen schools will open their doors and bid you come for all things are ready. This year's school is specially prepared to give a practical course in training. It is the best equipped of any school in a place of like size in the province and there are but few places of three times its size that equal it. Opportunities are proffered freely and it is yours to accept them with profit. Make ready and start with the opening of school. Be always on time, employ your talents wisely, and life has an allotted place that you can acceptably fill with profit.

The flour and feed milling industry of Canada is divided into two fairly well defined branches. In two branches combined there were, according to the latest returns, 1,127 mills of varying sized engaged in producing flour, chopped feeds and other commodities of these 1,127 mills the greater number, 741, were classified as feed and chopping mills, while 384 plants were engaged mainly in producing wheat flour. These 384 mills provide a capacity such in excess of the home market and form one of the leading sources of wheat flour. The value of the output of the combined industry, as seen on the upgrade since 1935 and both branches have shown gains in this period. The latest compilations are for 1935 but preliminary figures indicate a further advance during 1936.

The record of achievement of grain producers in overcoming the grain marketing monopoly which existed in the pioneer years. At one time in the history of the west a farmer couldn't load a car over a platform or dispose of his grain in any way save through a line elevator, and then only on the terms dictated by the elevator company. Naturally such a monopolistic system created abuses. Grain producers successfully fought the monopoly and overcame it through the building up of co-operative institutions of their own.

It is now a fact cry to the days of the early struggles of the pioneer grain farmers but the co-operative movement has gone onward. In this province it finds its highest development in Alberta Pool Elevators, an organization owned and controlled by grain producers and operated for the benefit of all.

Alberta Pool Elevators has determinedly fought for the welfare of the grain growing industry. Today it stands as a monument to the accomplishments of the pioneers in the co-operative movement. Farmers of the present age may know little of the struggles of older generations, but nevertheless they are being greatly benefited thereby.

**BOYS' AND GIRLS' FARM CLUB WORK**

One of the distinctive features of modern agriculture in the Dominion of Canada is the prominence of youth in all that pertains to the industry. This was not always so, says the Department of Agriculture, Ottawa. In times gone by, owing to force of circumstances, there was little inducement to youth on the farm further than to labor for hard work, but since the interest of young people has been aroused, the love of achievement in the oldest and greatest of all industries has placed the young farmer in a position of commanding importance.

The commanding position is in the hands of the youth of the most progressive and encouraging movements of modern time, and far club organization for girls and

A family reunion was held a few days ago when Mrs. Schmidt's family of ten and five daughters gathered at the home of Mr. and Mrs. Lake for dinner. One son from Talor was unable to attend. Those present were Mr. and Mrs. Schmidt and daughter of Talor; Mr. and Mrs. Frost of Lathbridge; Mr. and Mrs. Cal Schmidt of Havre, Montana; Mrs. Fischer and Lorna of Paynesville, Minn.; Mr. and Mrs. W. Schmidt; Billy of Gleichen; Mrs. Ruth Simpson and June of Medicine Hat; Mrs. Wedsdale and children of Rosemary; Mr. and Mrs. J. Schmidt of Calgary; Mr. and Mrs. Owen Lake and family of Duchess and S. Schmidt also of Duchess and Mrs. Eaton of Calgary were also present.—Brooks Bulletin.

Under the command of Major Dodson, with Lt. Taylor as second in command the 22nd Battery returned from Camp Shilo Sunday night after spending 10 days training. The boys were welcomed back by a large crowd of townspeople who waited at the station for more than an hour owing to the train being late. With the exception of one day's rain the weather was ideal for training and all report having "a wonderful time." Two of the local boys, Sgt. H. Bogstie and Sgt. W. Hill decided to try army life and are now with the R.C.H.A. at Winnipeg. This makes three men from Gleichen with the R.C.H.A. at Winnipeg, Sgt. C. O. Phillips having joined some 11 months ago while at camp the local boys played the regulars of the R.C.H.A., a baseball game. Victory went to the regulars with a score of 5-8. The game was played in grass knee high considering the score it must have been a splendid game. Howard Bowen was the only casualty reported in the Gleichen contingent. From what can be learned "Skinny" tossed a cannon ball into a gun and one of the boys closed the door a little to quiet a snail part of "Skinny's" finger went off in the direction of the target.

Officially known as "Boys and Girls' Farm Club Work in Canada," the movement is designed to develop interest in the farm and farm life; to provide a practical education in agriculture and home economics; to improve farm practices; to encourage the use of better livestock and seed, and to train young people for citizenship in their respective districts.

The boys' and girls' farm club work is co-ordinated by Dominion and provincial Departments of Agriculture, and Extension Departments of the Universities and Agricultural Colleges, and is consolidated and co-ordinated through the "Canadian Council on Boys' and Girls' Farm Work." The movement is active in its scope and outlook, and there is an increasing enrolment of members. In 1931 there were 1,215 clubs with a membership of 21,142. In 1936 the number of clubs had increased to 2,098 and the membership to 34,457.

The membership of the Canadian Council on Boys' and Girls' Farm Club Work includes the Dominion Department of Agriculture, and the Provincial Department of Agriculture.

## FROM THE FILES OF GLEICHEN CALL TWENTY YEARS AGO

Mrs. Breerton returned Friday from Calgary where she has been for some time past.

Chris Christianson returned last week from an extended trip through the states.

Chris Bartsch's outfit pulled out on its south ranch Tuesday to start harvest operations with eight loads and over fifty horses.

Miss E. Bell Larkin has been offered the business management of Chautauque and may accept the position. Friday night some miscreant cut the town hose attached to be hydrant in front of Pirkhard & Tuck's store which had been left there for use in mixing concrete. The hose extended around in front of the Busy Store and each length was cut at the connections

## RUSH WORK ON SOUTH ALBERTA MAIN HIGHWAYS

Graveling has been undertaken on 412 miles of Alberta highways, according to official figures given out by Hon. W. A. Follow, minister of public works.

In addition the province has included on this year's program of road improvements 180 miles of grading and 47 miles of blotter surfacing.

One of the main blotter surfacing projects is the 61 mile highway from Waterton Lakes to Macleod, where new graveling has been carried out this year. The department is speeding up the work, as this is one of the major links in the park-to-park hard surfaced highway network. Just as soon as this work is completed and other gaps filled in, it is believed that there will be an increased influx of tourists from the United States, anxious to see the great national parks of this province.

Between Calgary and Midnapore, the public works department has laid final surfacing in the form of "seal coating" making this one of the first stretches of hard surfaced highway in the province. This stretch is seven miles long.

Long advocated by the Alberta Motor Association, hard surfacing is continuing to make steady gains in this province.

## THE WORLD OF WHEAT

By H. G. L. Strange, Director of "Crop Testing Plan."

More "purchasing power." That's what is needed!

On all sides we hear of this need today. Discussion about it ranges all the way from dignified debate to acrimonious dispute.

It is quite apparent, however, that much of the argument is wasted energy, for those who are discussing and disputing have often different ideas as to just what they mean by "purchasing power."

For instance: farmers who may have a thousand dollars today sometimes consider they have the same "purchasing power" as a farmer who had a thousand dollars in 1913. What they have is the same "spending power" but the "purchasing power" is less, because a thousand dollars today will only purchase about 75 per cent of the goods it would in 1913.

A German miller with a million marks has the same spending power as he had in 1913, but his purchasing power in Canadian wheat might not be more than about 75 per cent as compared with 1913, and his purchasing power in Canadian wheat might be nothing at all, unless his Marks can be exchanged for Canadian dollars which is only possible if the German people can sell their own goods abroad.

So here the one expression "purchasing power" has three entirely distinct meanings.

Following factors have tended to raise price: Canadian wheat carry-over to 37 million. Australian wheat crop privately estimated at 140 million. Moisture in Southern Hemisphere still somewhat deficient. Increased hostilities between China and Japan. Germany buying Argentine corn. Italy purchasing American wheat. Money inflation apparently beginning to be felt in price of commodities.

Following factors have tended to lower price: Broomhall estimates world's import demands will be only 406 million. Russia offering wheat freely. Estimate Italian wheat crop 206 million against 225 last year. Indian wheat estimates 335 million vs last 352 last year. Danubian countries will have generous supplies for export. Heavy exports of citrus fruits from Palestine.

and also about the centre. No reason can be assigned for such a senseless act and when the guilty party is caught Ponoka is the rightful place for him.

At 11 o'clock Tuesday morning, August 21st, the wedding of Miss Edith Elizabeth Jones and Mr. Herbert Lockyear took place in St. Andrew's Church, Canon Stocken officiating. The bride is the second daughter of Mr. and Mrs. A. B. Jones and has lived here most of her life.

## Judging by Experience

Judging by experience a good place to deliver your grain is your U.G.G. Elevator.

That, for many years, has been the experience of thousands of farmers throughout western Canada.

Deliver your Grain to

## UNITED GRAIN GROWERS

Elevators at: Gleichen, Arrowwood, Shoupsville, Cluny, Namaka.

## CALGARY DRY GINGER ALE

"The Finest--Bar None!"

Taste the Difference in this Supremely Superior Beverage—The West's Best.

Insist on the Genuine "BUFFALO BRAND"

A PRODUCT OF

THE CALGARY BREWING & MALTING CO. LTD.

## Aggressive For Agriculture

Alberta Pool Elevators have been an aggressive force on behalf of the grain producers of this province, ever since the organization was started.

Grain producers should never forget that Pool elevators, operated on a true co-operative basis, create no vested interest, constitute a bulwark against profiteering and satisfy the demand for efficiency.

Practical commonsense suggests that all grain producers should give full and effective support to

## Doctor And Patient

A symposium of replies to a questionnaire sent out to doctors by the American Foundation on the availability of adequate medical care for the populace generally, probably affords a key to the reason for the growing public demand for systems of state medicine or state health insurance.

The replies indicate that, in a broad sense, adequate medical care, no matter how conservatively the phrase is interpreted, is not generally available and certainly not as available as it should be, and for a number of reasons.

While the information and opinion secured is, of course, applicable to conditions in the United States, there is little doubt that it is equally applicable in Canada, and in some respects more particularly in Western Canada, where similar social and economic conditions exist to those on the other side of the international boundary.

That the problem of providing adequate medical care for the people is bounded by social and economic conditions is specifically revealed in the numerous replies received and it is because of this fact that public demand for state medicine is becoming such a prominent issue nowadays.

Quoting the Foundation's own summation of the replies to the question: "Is adequate medical care now readily available?" the Foundation points out that many agree there is no categorical answer to such a question because of disagreement as to its meaning, "but, if medical care is interpreted to mean the kind of care needed to enable citizens to maintain 'positive' health, preventing incipient illness from progressing to serious consequences, as well as doing all that can be done to restore the sick individual to health, the weight of opinion is that adequate medical care is not available."

"Even if adequate medical care is less ambitiously defined," to further quote the Foundation's summary as reported in the current issue of the "Canadian Doctor," "this section contains a good deal of evidence in the form of not statistics but of direct picture (by men on the scene) to justify the premise that a large part of the population does not receive adequate medical care."

"(a) because it costs too much, especially hospital service and laboratory aids to diagnosis;

"(b) because it is too far away, as in the vast agricultural areas far removed from medical centres and without either hospitals or practitioners;

"(c) because the public generally does not understand and is not asking for modern scientific medical care, much of the population definitely preferring quacks, cutlises and patent medicines, and, finally and most important;

"(d) because in the medical care of the present 'the best is not yet good enough', to cite many spokesmen.

"The reasons why medical care is not yet good enough are many, but these are the reasons most frequently brought forward by the physicians:

"(a) There is a lag of years in applying new medical knowledge;

"(b) present medical training is not yet uniformly good;

"(c) present licensing is too broad;

"(d) too many graduates do not or cannot keep up their competence;

"(e) medical imagination still does not sufficiently perceive that prevention rather than cure is the real and ultimate goal of medical science, as many competent leaders of medical science in this discussion declare it to be."

In view of the fact that the foregoing conclusions represent the consensus of opinion of apparently a substantial cross section of the medical profession, considerable weight must be given to the information, but it should be pointed out that it does not necessarily coincide with the lay viewpoint in its entirety.

When for instance the medical men declare that a large percentage of the population does not receive adequate medical care "because the public generally does not understand and is not asking for modern scientific medical care," they are making a statement which is open to debate.

It could very well be argued that a substantial percentage of the public does not understand modern medical science, not because of any lack of desire to do so, but because there are yet too many doctors who adhere to the old fashioned doctrine that the less the patient is told the better and it is not surprising if, under such circumstances, patients fall back on the too volatile quack for remedy.

In the minds of the public the practice of medicine is often too much shrouded in mystery which might be dispelled if more doctors took the patient into their confidence when making a diagnosis and wrote their prescriptions in a form which could be understood by a layman.

After all no person has a greater right to know what is wrong with him or her, to know what the doctor believes to be the cause of the ailment and the remedy that is being prescribed than the patient who is paying or "owing" for the service.

Sometimes a little more explanation of causes, conditions and treatment would create a greater public confidence which would yield dividends to the "regular" medical profession.

### An Old Garden Flower

The dahlia has been grown as a garden flower for about 100 years. However, the most popular variety the Cactus, did not appear until about 1880. A more recent type the Collarette, which is still unknown to many people, was introduced about 1900, and the Paeony-flowered variety not until 1908.

An average of 350,000 cars are stolen in United States each year.

The hide of a hippopotamus is 1½ inches thick.

The average mean temperature at Miami Beach is 75 degrees.

### BLACKHEADS

Don't squeeze blackheads—dissolve them. Get two ounces of peroxide powder from any drug store and rub gently with wet, hot cloth over the blackheads. They simply dissolve and disappear by this safe and new method. Have a Hollywood complexion.

### Honored By The King

Two officers who were in charge of police guarding the Duke of Windsor's Fort Belvedere country home during the days immediately preceding his abdication, were honored by the King at Buckingham Palace. They were Superintendent Curry and Sergeant Backshall, and it was understood they received the Royal Victorian Order.

### Some People Couldn't

In these days when camera snap excellent shots in 1/50th of a second, it's hard to realize that less than a century ago it took four minutes to an hour's exposure to register a likeness on the plate. That's a long time to look pleasant.

The father of Patrick Henry was born in Scotland. His mother was of Welsh descent.

A violin is composed of 70 separate parts.

## Where Law Is Helpless

Impossible To Force Any Person To Be Sensible

A case, the first of its kind, was tried in a Montreal court when a taxi driver was charged with leaving his car unlocked while on a city street. The charge was laid to test a statute in effect some years but only recently brought into force at request of automobile insurance companies to help halt car thefts. The accused was acquitted; so that evidently disposes of the statute.

It has been said that it is impossible to make people good by law; and apparently the law, speaking through this Montreal court, says it is useless to try to make people sensible by law. For one would hardly think a law would be needed to teach anyone that to lock a car is only ordinary common sense. Nobody with an ounce of brain would think of leaving a trunk or a suitcase on the sidewalk in a city with no one to watch it. Yet men, otherwise apparently sane, seem to think nothing of leaving valuable cars with the doors unlocked and the key in the ignition, inviting the first thief who happens along to drive off with it.

Police records all agree that locked cars are seldom, if ever, molested; and the reason for that is plain. To be seen trying to open a locked door immediately arouses suspicion, while no one pays much attention if he sees a man step into a car and drive off.

But, according to the Montreal court's ruling, the people of Quebec are to be allowed to make fools of themselves if they want to.

All the same, a law against leaving open cars sitting about would be useful in that it would make the owner liable through his negligence to pay the cost of recovering his car when it is stolen.—Owen Sound Sun Times.

## Trying To Salvage Ship

Believed To Have Foundered In Lake Huron In 1879

Robert Cavellier, Sieur de la Salle, the "Flying Dutchman" of the Great Lakes—may sail again, if the expedition planned by a Chicago yachtsman and explorer meets with success.

Eugene F. McDonald's Diesel yacht was loaded with diving and salvage equipment for a cruise to the western end of Manitoulin Island in Lake Huron where the pioneer explorer's ship—reported to be the first to ply the lakes—was believed to have sunk in 1879.

La Salle and Henri De Tonti built the Griffin at the head of Lake Erie in May, 1879. They sailed to what is now Green Bay, Wis., where the ship was laden with 10,000 furs. La Salle sent them to friends who helped finance his explorations.

But the Griffin never reached port. Lake authorities — and McDonald, who said he had studied all available evidence—believe she foundered off Manitoulin.

Old sailors say the Griffin sails each year when the lotus blooms. They say she is recognized by the eagle-headed, lion bodied Griffin figurehead protruding from her prow.

McDonald said he planned to anchor off the island, where he would meet Grant Turner of Little Current, Ont., since the Canadian Government granted him permission for the search provided a Canadian citizen accompanied him.

If the Griffin is found, McDonald said, efforts will be made to reconstruct the old ship so that she can sail along the Chicago waterway during the city's jubilee carnival of the lakes.

## Traffic Control For Planes

Vancouver Airport Has Installed Traffic Control Projector

Among recent additions to the Vancouver airport is an airport traffic control projector, one of the latest safety devices put on the market. Familiarly termed "traffic gun," lights of this type are used at all the leading United States airports for day and night control of aircraft not equipped with radio.

Although fitted with only a 50 candlepower lamp, the light is visible in bright sunlight for over three miles. The light is sighted like a gun and can also be used for code signalling with white, red or green light, as a spotlight, and for making estimates of the cloud ceiling at night.

This "projector" is believed to be the first of its kind used in Canada and became necessary through the steady increase of traffic at the airport.—Canadian Aviation.

Heaven only knows where the motor-world is hastening to. It has been well described by a Chinese observer as "motion without motive."

Canada has a total of 8,430,800 cattle and calves on its farms.

## Roads Of The World

Ford Has On Exhibit Materials From 18 Famous Highways

In the grounds of the Ford Rotunda at Dearborn, Michigan, the "Roads of the World," comprising materials from eighteen famous highways, has been opened to the public. The materials consist of stones, slabs and soil.

The dedication of the "roads" was witnessed by consular officers of countries represented in the roads, also many good roads officials.

Among the representations are the Asian Way, the famous Roman highway; the "Summer Palace" Road over which the Manchu emperors rolled from the old capital in what is to-day modern Peking to the royal Summer Palace; the ancient Grand Trunk Road of India, whose northern reaches led through the fabled Rhyther Pass, and the Diamond Road of South Africa, over which Cecil Rhodes transported fortunes in diamonds from the De Beers mines to Port Elizabeth.

## Naval Treaty Ratified

Provisions Of 1936 London Agreement Have Become Effective

Provisions of the 1936 London naval treaty became effective with the ratification by the United Kingdom, Canada, Australia, New Zealand and India.

Instruments of ratification were deposited at the foreign office. Sir Robert Van Stittart, permanent under-secretary for foreign affairs, signed for the United Kingdom; Sir Findlater Stewart, permanent under-secretary for India; High Commissioner Vincent Massey for Canada; High Commissioner Stanley Bruce for Australia; and High Commissioner W. J. Jordan for New Zealand.

The United States deposited ratification a year ago and France a few weeks ago. The treaty limits the size and armament but not the number of naval vessels and provides for an interchange of information regarding projected naval construction.

## Looks Like A Record

Remarkable Facts About Family Of 97-Year-Old Woman

Mrs. Anna Pond, of Waterford, Ont., is 97 years of age. She reads a good deal, and prefers newspapers because they come fresh each day. Mrs. Pond has no time for worrying and cannot be convinced that it ever goes any good anyway. If the weather is favorable this lady of 97 goes to church on Sunday and she also likes to attend Sunday school. What's more she walks. Both ways.

All of which is interesting but not so remarkable as other facts regarding her family. Mrs. Pond is the mother of 11 children and they are all living, and she herself is the eldest of a family of four and her two sisters and brother are also living. Their ages being 89, 82 and 86.

We cannot recall having read or heard of another case like that. A woman of 97 with 11 children living, and with all her own generation still here.—Petersboro Examiner.

## SELECTED RECIPES

### MAYONNAISE

1 egg  
2 tablespoons Crown Brand Corn Syrup  
2 teaspoons dry mustard  
1½ teaspoon salt  
1½ teaspoon paprika  
¼ cup vinegar  
¾ cup Mazola  
4 tablespoons Benson's Corn Starch

Method: Put the egg, Crown Brand Corn Syrup, seasonings, vinegar and Mazola in a bowl but do not stir. Make a paste by mixing Benson's Corn Starch with ½ cup cold water and add additional ½ cup water. Cook until clear. This is better done in top of double boiler, but it is not necessary. Add the Corn Starch mixture to ingredients in mixing bowl and beat with egg beater. It thickens and combines beautifully.

## The Really Honest Person

Is One Who Likes Mickey Mouse And Admits It

Charles B. Cochran, noted British producer, says he is "never bored with anything except a show that pretends to be intellectual — and isn't."

Something like the person who pretends to like grand opera—and doesn't. The really honest person is the one who likes Mickey Mouse—and admits it.

But, thank goodness, there is far less "intellectual snobbery" than there used to be. Credit that, at least, to the growing common sense of these times.—Halifax Herald.

## Large FLEET OWNERS find Firestone TIRES MOST ECONOMICAL

Large fleet owners who analyze tire costs to the fraction of a cent prefer Firestone Tires for their cost-cutting, carefree performance. You, too, will find them the safest, longest-wearing and most economical for your car.

With all their features for safe, long mileage, Firestone Tires do not cost one cent more than ordinary tires. See the nearest Firestone Dealer and replace worn tires today.

## Firestone HIGH SPEED TIRES

### Output Being Increased

New Equipment Has Been Installed At Ontario Radium Refinery

Dr. Marcel Pochon, director of the Ontario radium refinery at Port Hope, announced that the annual output at the refinery would be increased from one and a half ounces to four and one half (126 grams).

Dr. Pochon made the announcement following consultations with officials at the national research council at Ottawa, to which new equipment the refinery had purchased was sent for testing purposes.

The new equipment, Dr. Pochon said, would make it possible to supply some of the radium needed in the United States as well as in the British Empire which up to now has absorbed almost all the Canadian output.

### Left Estate To Servant

Lord Ormawhite, friend of Queen Mary and the late King George, left all of his estate—valued at £107,000 (\$532,590)—to the wife of his manservant, Rose Spary, and her two sons in equal shares. Lord Ormawhite was a widower when he died.

A 250-pound hog will yield from 12 to 15 per cent of its weight in zinc suitable for bacon.

Canada exported \$8,418,000 worth of zinc during 1935.

### Japan Using Wheat

Use Of Wheat Becoming More Popular Far Every Year

The use of wheat flour bread becomes more popular in Japan every year. It is estimated 42 per cent of wheat flour consumed is used for bread and cakes of various sorts, as compared with 35 per cent three years ago. The Japanese are fond of macaroni and formerly about 50 per cent of the flour was consumed in that way, but it is estimated to have decreased now to some 38 per cent. The chemical industry's use of flour has increased from 10 per cent to 15 per cent. The remaining five per cent is used in miscellaneous ways. While the bulk of bread consumed is white, whole wheat is gaining in favor. An interesting feature is the experiment recently made by one of the biggest bakeries in Tokyo of turning out oatmeal bread. This quickly became popular and the bakery can barely fill the demand.

### His Lucky Day

Columbus sailed on his first great voyage on Friday, started back on Friday, and arrived back in Spain on Friday; he started his second voyage on Friday, and discovered the Isle of Pines on Friday the 13th.

Few garden plants have been known to man longer than the cucumber. It has been under cultivation for about 4,000 years.

## Cut Down Food Wastage

—by covering all perishable goods with Para-Sani Heavy Waxed Paper, Para-Sani moisture-proof texture will keep them fresh until you are ready to use them.

You'll find the Para-Sani sanitary knuff-edged carton handy. Or use "Centre Pull" Packs in sheet form for less exacting uses. At grocers, druggists, stationers.

Appleford Paper Products

Warehouses at Calgary, Regina and Winnipeg.

## HOW ABOUT PRINTING

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to your self and your local paper to back up these efforts by at least having your printed matter done locally.

## The Gleichen Call

Thirty Years Serving Gleichen and Community

## Town & District

Miss Mildred King of Calgary is visiting at the home of Miss Marjorie Birch.

Miss Allison Evans of the Miskiwicordia Hospital staff, Edmonton is at present spending her holidays in Gleichen.

About the busiest men in town during the past several weeks are the implement men. There has been a lot of activity around their joints.

Bill Taylor spent a couple of days in town during the week visiting his parents prior to returning to Trail, B. C., where he will resume his position with the smelter company.

Mrs. M. Brown, arrived from Lehigh last week and will permanently reside here.

Mr. and Mrs. Glen House of Arrowwood spent several days in town last week visiting friends. Mr. House states that crops are not very good in his district and that he will be short of feed this winter for his stock.

Not long ago a young man in town was overheard discussing the topic of leadership excitedly, it being evident that he considered himself a leader. Once in a while he will be overheard discussing leadership, the while doing nothing about it. His attitude revealed much of the latter and none of the spirit of leadership. A cultured Irishman once remarked he was getting along fairly well in this country, but was having some trouble in making his Celtic dreams come true. The naive manner in which he said this was comical, but his honest realization of the need of a practical working out of a dream gives him a great advantage over the "leadership" young man. The latter hasn't yet arrived at the point of this honest truth and we fear, will go back to dust without knowing why he didn't win the plaudits of his fellow men for leadership. In world affairs today, as was always the case, there are outstanding examples of leadership, but sadly, of that high prominence reached under the lash of selfish ambition. Under such leaders change is occurring but often change does not imply desirable advancement. And still conditions of the people of the world are getting better. How come? It is just that plain men and women all over the world are finding contentment in expressing themselves helpfully, without show, and in most cases these would be amazed if it were suggested to them that their constructive actions merited praise.

Three life savings in one day was a record made by a Boy Scout. During an afternoon he rescued a baby, a girl swimmer who had got into difficulties, and a girl who had broken a leg when jumping from a narrow diving board. For the latter girl he improvised a splint, and saw her safely to a hospital fifteen miles away.

## MAE WEST

"GO WEST YOUNG MAN"  
Mae meets a new kind of man on barnyard circuit, where the hay is cut early, but the head-dry isn't.
